## Education

---

### Massachusetts Institute of Technology

SEP 2019 - EXPECTED JUN 2023

- Pursuing a B.S. in Computer Science
- Current courses: Computational Structures and Introduction to Machine Learning

## Skills

---

**Software:** C++ (100k+ lines), Python (Django), Javascript (PhaserJS, NodeJS), Java, C#, HTML, CSS, Linux, Git

**Languages:** Fluent in English and Bulgarian, beginner in German

## Projects

---

**Nitwit:** A C++ compiler a made up programming language

**Gemini:** A co-op puzzle platformer implemented in JavaScript

**Stealth:** A top-down 2D game implemented in JavaScript

**Judge System:** A Django system for automated testing of solutions to algorithmic problems

## Awards

---

### Gold Medals:

- International Olympiad of Informatics 2018
- Balkan Olympiad of Informatics 2018
- Romanian Masters of Informatics 2018

### Silver Medals:

- European Physics Olympiad 2019
- International Olympiad of Informatics 2019
- International Olympiad of Informatics 2016

## Experience

---

### National Informatics Camps / Instructor

AUG 2017 - JUN 2019, BULGARIA

- Prepared and presented three lectures on data structures and algorithms topics to 20 high school students.
- Prepared practice tasks to complement the discussed material.

### Softuni / C# Basics Instructor

JAN 2017 - APR 2017, VARNA, BULGARIA

- Taught an introductory C# course to 40 students of various ages.
- Completed twelve four-hour lectures.
